

WDD 131: Dynamic Web Fundamentals

W04 Project: Website Subject

By Berny Fred

**Subject:** Handicraft Shop

**Content:** This website will be use to display handicraft products that KNCC store is selling and as well as to why the store existed. The website will have a home page will have few pictures handicraft with a hero. The home page will also have a small introduction as to why the store existed and how the products came from and who made them. The homepage will also include some of the people who made the handicrafts and with small descriptions. The second page will have a gallery of pictures, with each picture having its own description and price. The website will have a contact/About Us page. This page will have a form, a comment section, and a map if necessary.

**Reason:** The thing about this topic that makes me so passionate to create a website is not the products themselves but the beauty of the artwork the people had provided.
